DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: Examiner suggests applicant replace attorney docket numbers with US application numbers for related applications on page 1.
2. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 2, 10, and 18 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure, which is not enabling. The limitation "channel order", critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976). Since symbol distribution based on a "channel order" appears to be the distinguishing feature of the claimed invention, it should be

clearly described in the specification. Examiner is unable to clearly acknowledge the scope or meaning of this claimed "channel order".
